Projects

Fully automatic life alert style heart rate monitor

<https://cryonics-member-response-info.herokuapp.com/>

Screenshot of the associated watchface for a fully automatic system that sends out text/calls via twilio when no heart rate is detected for 20 seconds. This is a completed and partially funded project that is currently in use within a select group of about 15 users.

<https://github.com/gshaver82/cryonics-member-response-info>

Currently working on a mobile app built in flutter that will connect with multiple devices.

Phasmaphobia ghost filter

<https://phasmaphobia-ghost-filter.herokuapp.com>

A clean simple ghost filter for the game Phasmaphobia. Takes confirmed or excluded clues and tells the user what ghost(s) fit the criteria, and also what remaining clues are valid. React, Javascript, HTML, CSS

<https://github.com/gshaver82/phasmaphobia-ghost-filter>

Recipe Box

<https://project-3-recipe-box.herokuapp.com/>

Group project designed to authenticate users for recipe creation and saving. Designed for absolute minimal UI in between user and a created recipe in the database, even going as far as storing most commonly used user/public ingredients and having them available to 1click insert during recipe creation.

React, Javascript, HTML, CSS, firebase, Oauth, Mongo, many secondary packages

<https://github.com/PeterBaker644/Recipe-Journal>

Mixtape

<https://project-2-mixtape.herokuapp.com>

Group project designed to be a social media music sharing website. Built on 4 linked SQL tables for users to vote on their favorite playlists. Javascript, HTML, CSS, JQuery, SQL, Sequelize

<https://github.com/PeterBaker644/Mixtape>

Experience

Freelance Sept 2021 - Present

Developer – Developed life alert style system for Minnesota Cryonics Rapid Response non profit organization.
